SnagBane

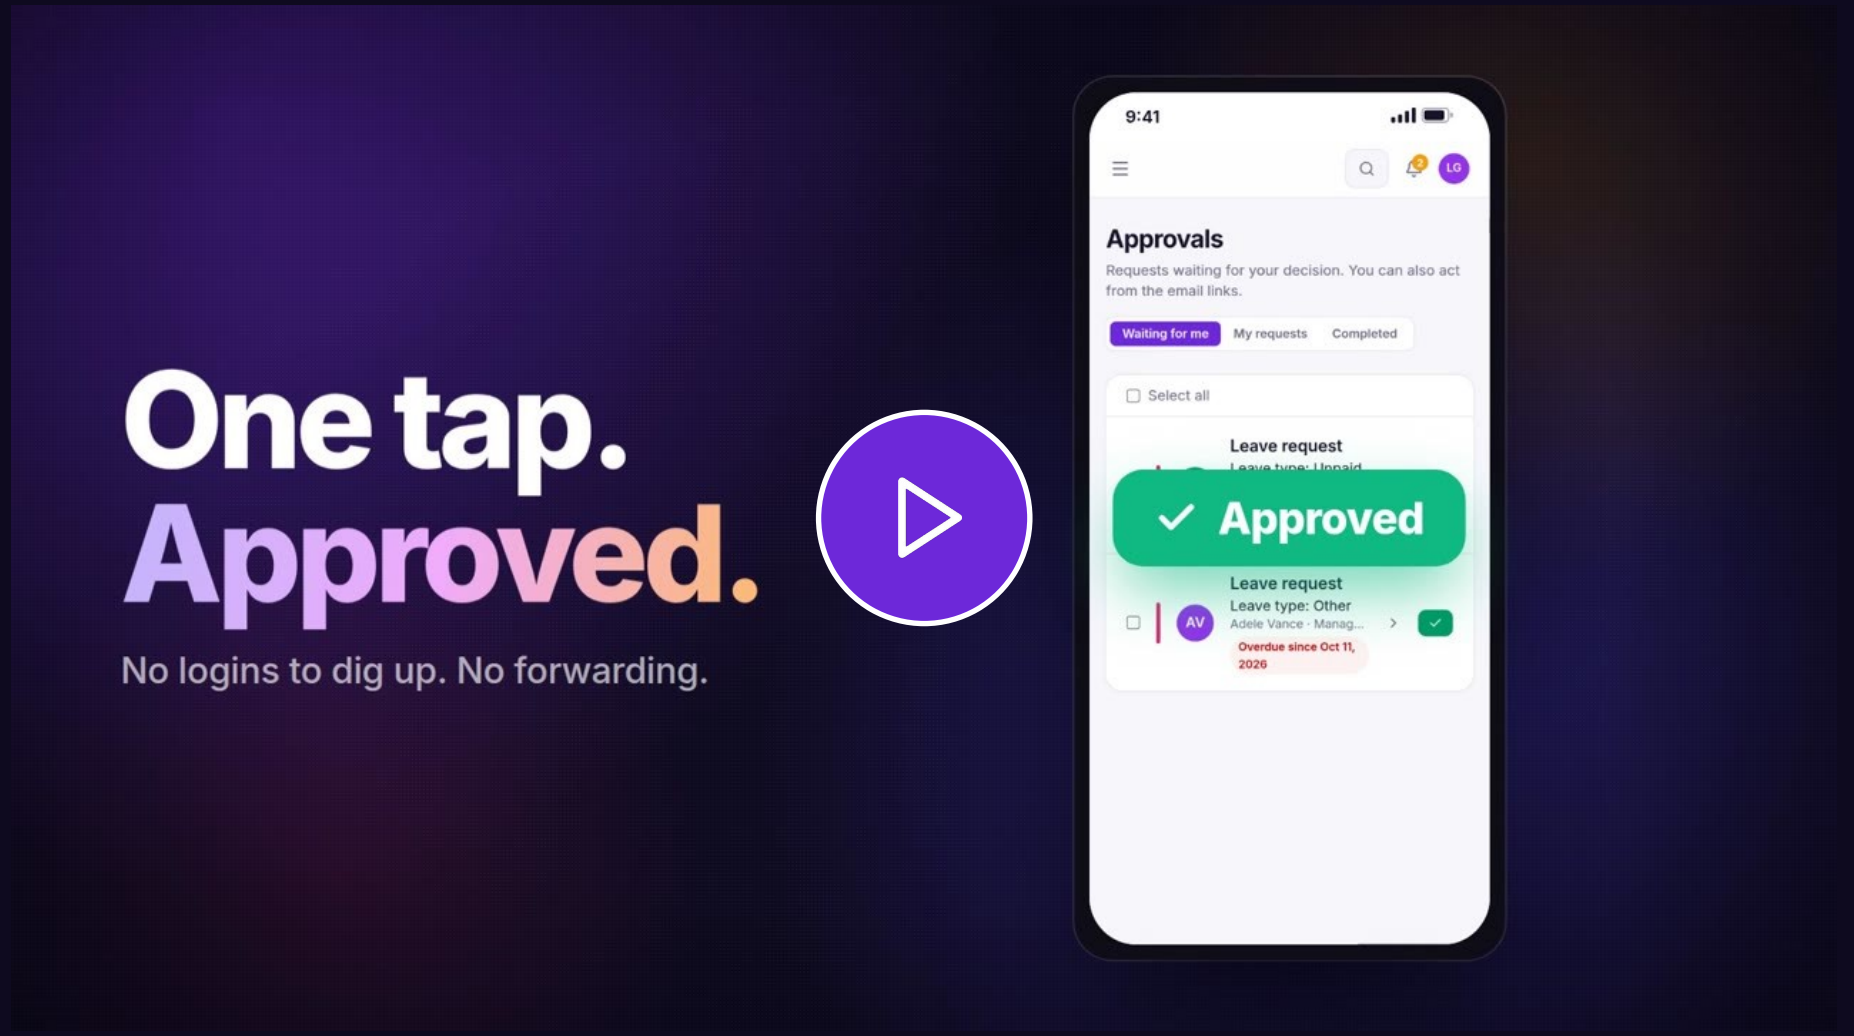

# Every request and approval in one place

Self-hosted forms and approvals that work with Microsoft 365, Google Workspace and Okta.

snagbane.com

# SnagBane in one minute

Watch the film: snagbane.com

# Requests still live in inboxes and spreadsheets

## Lost in email

Leave, purchases and IT access go back and forth by email. Nobody knows who has to decide next.

## Nothing moves

Requests wait for days because an approver missed the message, and someone has to chase them.

## Old tools, one-off fixes

InfoPath is retired, and building a Power Automate flow for every process doesn’t scale.

# One system for every process

1

## Forms in minutes

Start from 100+ templates or import Microsoft Forms, Google Forms and InfoPath.

2

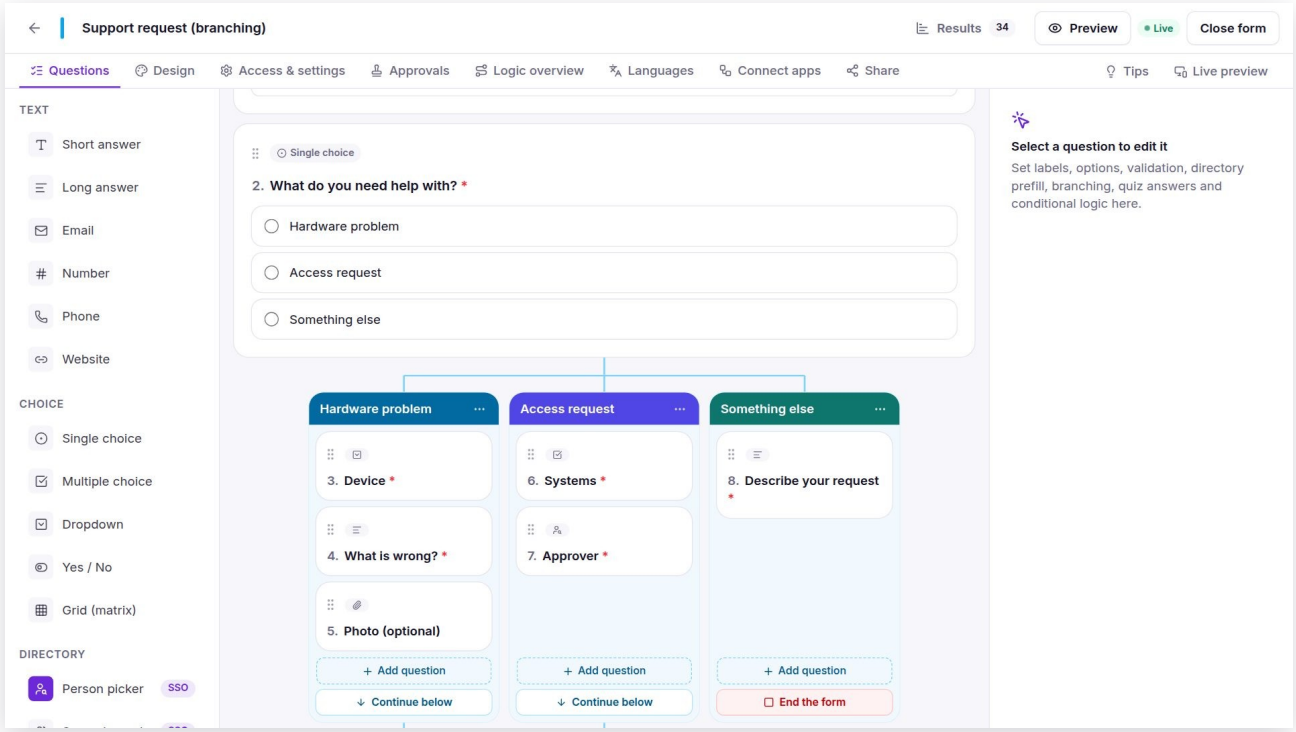

## Approvals that move

Managers, groups and several stages, with reminders and deadlines.

3

## Automatic follow-up

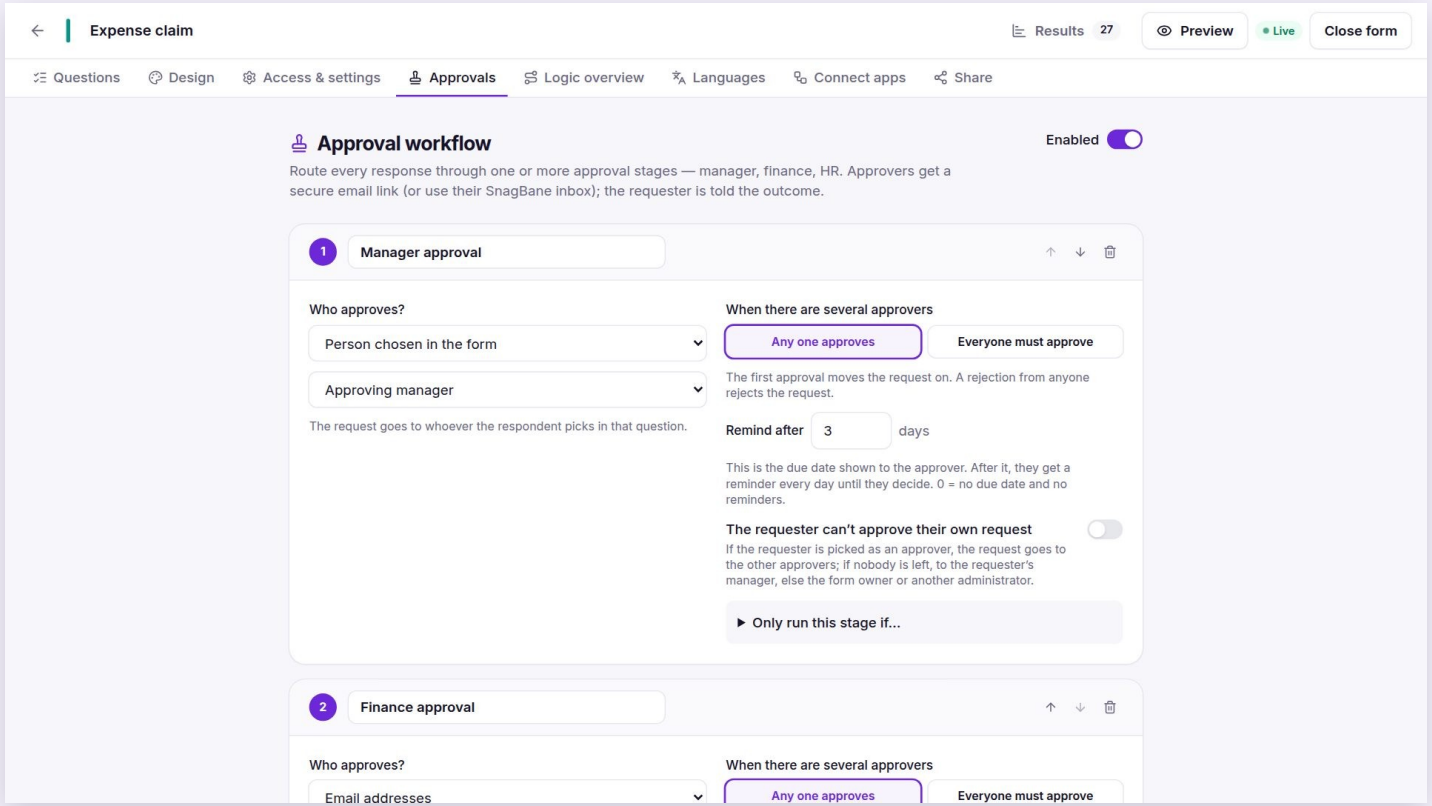

Results go to SharePoint, Excel, Jira, Teams and more after the decision.

SnagBane

# Approvals with clear rules

- Manager, person chosen in the form, group or email
- Any one or everyone must approve
- Reminders and due dates per stage
- The requester can't approve their own request
- Change the approver when someone is away

SnagBane

# Decide in one tap, anywhere

## Email

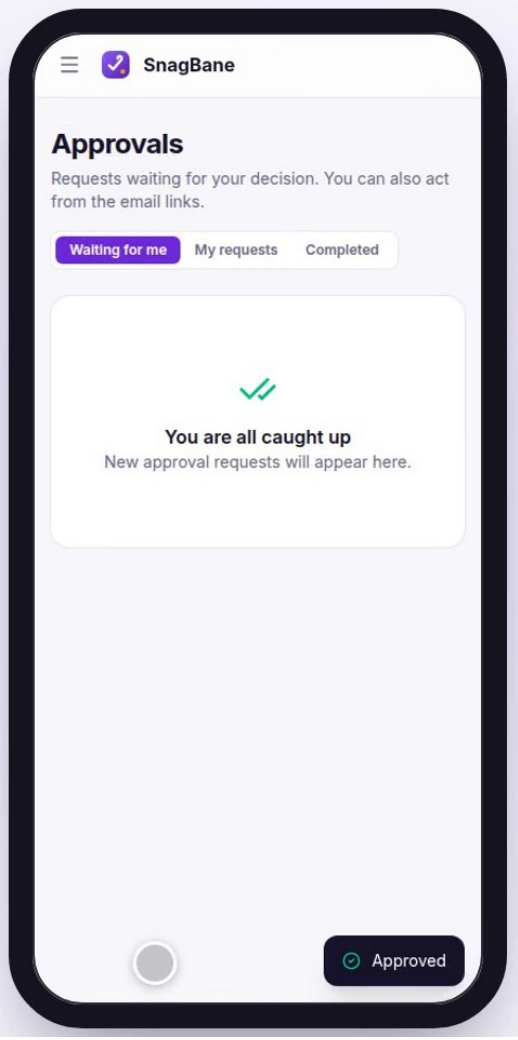

A secure link in every approval email

## Microsoft Teams

Approvals as a Teams app with notifications

## Phone

An app on the home screen with push notifications

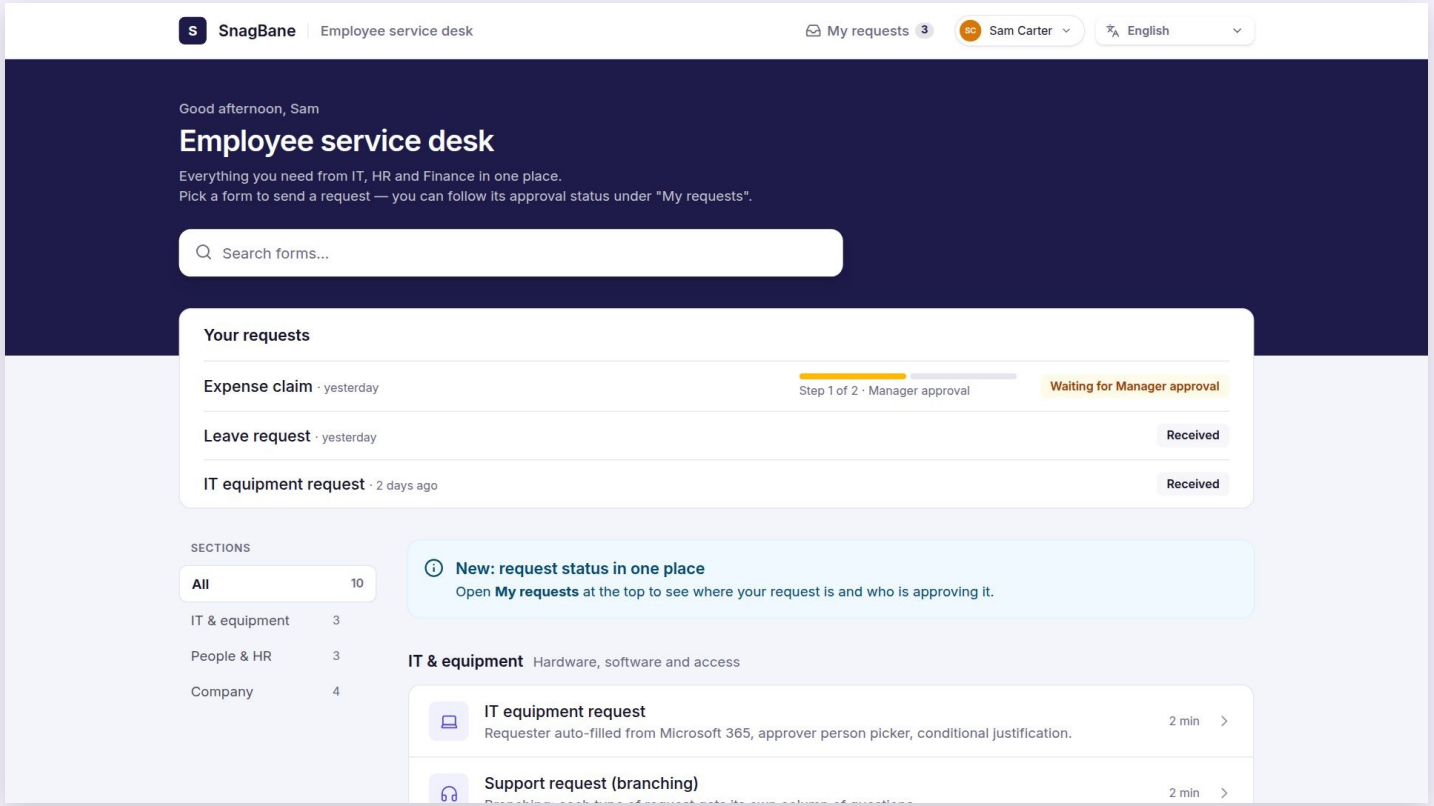

SnagBane

# One portal for every request

Employees find every form in one place and follow their own requests step by step.

Works as a web page or as a tab in Microsoft Teams, in the company's colours, with 20 looks to choose from.

SnagBane

# Works with the tools you already use

| | | | | | |
|---|---|---|---|---|---|
| Microsoft 365 | Teams | SharePoint | Excel | Outlook | Power Automate |
| Google Workspace | Gmail | Google Sheets | Okta | Slack | Jira |
| Trello | Asana | monday.com | ClickUp | Salesforce | Dynamics 365 |
| DocuSign | Stripe | Zapier | Make | n8n | REST API |

Plus webhooks for anything else. Integrations depend on the plan — see snagbane.com/integrations.

SnagBane

# Your server. Your data.

### Self-hosted

Runs on your own server: Docker, Linux or PHP hosting

### Single sign-on

Microsoft Entra ID, Google, Okta and SAML

### Two-step sign-in
